- SEO
- Data Analytics

Julio Lopez

SUMMARY

I am a seasoned Software Engineer with over 8 years of dedicated experience in the IT industry. My expertise lies in the development of a diverse range of applications, spanning Web, Android, API Integration, and Standalone Desktop solutions. Through collaborative engagements with both local and international enterprises, I have honed not only my technical prowess but also my commitment to delivering top-notch results.

My proficiency extends to the realm of database management, where I have adeptly worked with prominent engines including MS SQL Server, MySQL, and Oracle. With a track record of more than 8 years, I have successfully overseen SQL databases featuring replication capabilities. This strategic oversight has significantly contributed to bolstering data integrity and redundancy across multiple area offices. Beyond my software engineering pursuits, I am an accomplished 3D and Visual Effect Artist/Freelancer. In this capacity, I have forged impactful partnerships with international companies, collaborating on a spectrum of projects encompassing dynamic visual effects for advertisements and short films.

EXPERIENCE

January 2019 - Current

Full Stack Software Developer - Just Click Integrated Solutions
Cebu City

- Provided multi-platform software solutions to local companies and utilities.
- Created integrated solutions and APIs for local clients with stand-alone software setups.

June 2017 - Current

Software Engineer - Bohol I Electric Cooperative, Inc.
Bohol

- Led the digitalization transformation of the company.
- Developed and engineered modern software solutions that run across multiple platforms (web, mobile, desktop).
- Designed and engineered the entire database structure of the company, and provided replication services across internal and remote servers to ensure data integrity.

February 2014 - Current

Freelance Software Engineer - International Clients

- Have worked with several clients abroad, and have collaborated with teams in both on-site and hybrid (online) scenarios.
- Developed apps on all platforms (web, android, iOS, windows/desktop, embedded systems) in parallel with the client's needs.

EDUCATION

2017

Bachelor of Science | Information Technology
Mater Dei College, Bohol, Philippines
